

DC:0–5™ Training Handout

MULTIAXIAL FRAMEWORK WORKSHEET

Child's name: _____ Date completed: _____ Clinician: _____

In formulating diagnostic summary, begin with contextual Axes III, IV, and V before completing Axis II and Axis I.

Axis III: Physical Health Conditions and Considerations:

Include prenatal conditions and exposures, chronic medical conditions, acute medical conditions, history of procedures (date, procedure, days hospitalized), recurrent or chronic pain, physical injuries or exposures, medication effects, and markers of health status

Axis IV: Psychosocial Stressors:

(see DC:0–5, pp. 154–158, for examples)

Stressor Type	Describe stressors	Age of onset	Comments, including duration and severity
Challenges within the infant's/young child's family or primary support group			
Challenges in the social environment			
Educational or child care challenges			
Housing challenges			
Economic and employment challenges			

(continued)

DC:0–5™ Training Handout

MULTIAXIAL FRAMEWORK WORKSHEET

Stressor Type	Describe stressors	Age of onset	Comments, including duration and severity
Infant/young child health			
Legal or criminal justice challenges			
Other			

Axis V: Developmental Competence:

(see DC:0–5 Appendix A, pp. 161–185, for milestones)

Competency Domain Rating	Emotional	Social–Relational	Language–Social Communication	Cognitive	Movement and Physical
Exceeds developmental expectations					
Functions at age-appropriate level					
Competencies are inconsistently present or emerging					
Not meeting developmental expectations (delay or deviance)					

Notes and Considerations:

MULTIAXIAL FRAMEWORK WORKSHEET

Axis II: Relational Context:

A. Caregiver–Infant/Young Child Relationship Adaptation (adaptive quality of the relationship between a primary caregiver and an infant/young child)

Dimensions of Caregiving (if relationship with more than one caregiver is being rated, write in the caregiver, e.g. “mother,” “grandmother”, in the box)

Caregiving Dimension	Contribution to Relationship Quality		
	Strength	Not a concern	Concern
Ensuring physical safety			
Providing for basic needs (e.g., food, hygiene, clothing, housing, health care)			
Conveying psychological commitment to and emotional investment in the infant/young child			
Establishing structure and routines			
Recognizing and responding to the infant’s/young child’s emotional needs and signals			
Providing comfort for distress			
Teaching and social stimulation			
Socializing			
Disciplining			
Engaging in play and enjoyable activities			
Showing interest in the infant’s/young child’s individual experiences and perspectives			
Demonstrating reflective capacity regarding the infant’s/young child’s developmental trajectory			
Incorporating the infant’s/young child’s point of view in developmentally appropriate ways			
Tolerating ambivalent feelings in the caregiver–infant/young adult relationship			

DC:0–5™ Training Handout

MULTIAXIAL FRAMEWORK WORKSHEET

Infant's/Young Child's Contributions to the Relationship

Child Characteristics	Contribution to Relationship Quality		
	Strength	Not a concern	Concern
Temperamental dispositions			
Sensory profile			
Physical appearance			
Physical health (from Axis III)			
Developmental status (from Axes I and V)			
Mental health (from Axis I)			
Learning style			

Level of Adaptive Functioning—Caregiving Dimension (rate for each caregiver)

Caregiver	Level of Adaptive Functioning	
		Code: Level 1 = Well-Adapted to Good Enough Level 2 = Strained to Concerning Level 3 = Compromised to Disturbed Level 4 = Disordered to Dangerous

DC:0–5™ Training Handout

MULTIAXIAL FRAMEWORK WORKSHEET

B. Caregiving Environment and Infant/Young Child Adaptation

Dimensions of the Caregiving Environment (“the web of caregiving relationships surrounding the infant/young child, regardless of whether the caregivers live together”)

Caregiving Dimension	Contribution to Relationship Quality		
	Strength	Not a concern	Concern
Problem solving			
Conflict resolution			
Caregiving role allocation			
Caregiving communication: Instrumental			
Caregiving communication: Emotional			
Emotional investment			
Behavioral regulation and coordination			
Sibling harmony			

Level of Adaptive Functioning—Caregiving Environment: _____

(Level 1, 2, 3, or 4—see previous page)

Axis I: Clinical Disorders:

Consider whether there is evidence of trauma, chronic toxic stress, or significant loss/deprivation. Consider any rule out of disorders based on differential diagnosis.

List all diagnoses. **Bold** the diagnosis that will be primary focus of mental health treatment.
